MEMORANDUM     **WAYNE COUNTY HEALTH DEPARTMENT  
AIR POLLUTION CONTROL DIVISION**

Date:        October 2, 1990

To:          File

From:        P. Warner *PW*

Subject:     Air Sampling Program, WC Buildings Division,  
              Northville, Acid Spill Remediation

In response to the need to assess the degree of possible contamination of breathing air in the indoor atmosphere of the WC Power Plant, Plymouth Center Facility, Northville, air sampling will be conducted for both particulate as sodium carbonate (soda ash) and for any residual acid mist.

Appropriate sampling for particulate will employ a 37 mm glass fiber filter and for acid mist, a dual impinger system containing distilled water. Both the basement level and first floor of the building must be sampled to insure adequate assessment for safe entry. This sampling will be conducted between the dates of October 5th and 11th with laboratory analyses of samples obtained during the working week following sample collection.
